

AYUSH KUMAR SINGH

Ranchi, India | ayushsingh20112004@gmail.com | github.com/letsheck | LinkedIn

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience across SQL, Python, Excel, Power BI, and Tableau, building end-to-end workflows from raw data cleaning through exploratory analysis to interactive dashboards. Skilled at translating datasets into business-relevant insights for investment, sales, and operational decision-making. Strong foundation in data integrity and structured problem-solving from a cybersecurity engineering background.

EDUCATION

Chandigarh University

Expected July 2027

B.E., Cybersecurity Engineering — SGPA: 8.47/10 | University Rank: 27

Punjab, India

TECHNICAL SKILLS

Languages: Python, SQL (MySQL)

Data Analysis & Visualization: Excel (Pivot Tables, XLOOKUP/VLOOKUP, Conditional Formatting, Data Validation), Power BI (DAX, Power Query, Interactive Dashboards), Tableau, ETL, Pandas, NumPy, Matplotlib, Seaborn

Databases & Cloud: MySQL, AWS (EC2, S3, IAM)

Tools: Git/GitHub, GitHub Actions, Docker, Jupyter Notebook

PROJECTS

Data Professional Survey Breakdown Dashboard

Power BI

- Designed an interactive multi-visual dashboard analyzing 420+ data professional survey responses covering salary, role, country, and job satisfaction metrics
- Built DAX measures to calculate average salary, average age, and happiness scores (work-life balance and salary) surfaced through KPI cards and gauge visuals
- Visualized country-wise salary distribution via treemap, job-title salary comparison via bar charts, and career-entry difficulty via donut chart to identify workforce trends
- Implemented cross-filtering slicers and a filter panel enabling dynamic segmentation by job title and programming language preference

Bike Sales Customer Analytics Dashboard

Excel

- Cleaned and standardized a 1,000+ record customer sales dataset using Find & Replace and formula-based corrections to fix inconsistent categorical entries across marital status, region, and occupation fields
- Engineered a derived age-bracket column (Adolescent/Middle Age/Old) using nested IF formulas to segment customers for demographic analysis
- Built multiple Pivot Tables to analyze average income by gender and purchase counts by commute distance and age segment
- Designed an interactive Bike Sales Dashboard with bar and line charts plus slicers, enabling dynamic filtering of customer segments to surface purchase-behavior trends

Airbnb Rental Market Analysis Dashboard

Tableau

- Built an interactive multi-sheet Tableau dashboard analyzing 5 years of Airbnb listings data across zip codes to identify high-return rental markets for property investors
- Designed a choropleth price map, ranked bar charts, and a time-series revenue trend view to visualize average nightly price, review volume, and revenue by geography
- Surfaced actionable insights distinguishing high-price/low-demand zip codes from consistently high-occupancy areas to simulate real estate investment decision-making

Global Video Game Sales Analysis

Tableau

- Visualized global video game sales data across 12+ genres and platforms, ranking category performance by total units sold
- Built genre-wise comparison charts distinguishing record count metrics from actual sales figures to ensure accurate business reporting

Layoffs Data Cleaning & Exploratory Data Analysis

SQL (MySQL)

- Cleaned a real-world layoffs dataset by removing duplicates with ROW_NUMBER() and PARTITION BY, standardizing inconsistent entries, and converting date formats using STR_TO_DATE
- Conducted exploratory data analysis using window functions (SUM() OVER(), DENSE_RANK()) to calculate rolling layoff totals and year-over-year company/industry rankings
- Documented the complete workflow and queries on GitHub as a public, reproducible case study

Threat Intelligence RAG System

Python, LangChain, FAISS, AWS

- Built a semantic search system over 10,000+ CVE records using LangChain, FAISS, and HuggingFace embeddings, served via FastAPI with sub-100ms response times
- Deployed on AWS EC2 with a GitHub Actions CI/CD pipeline for automated testing and deployment

CERTIFICATIONS

CompTIA Security+ | Google Cybersecurity Professional Certificate | Python for Everybody (University of Michigan, via Coursera)
